Chapter 1: The Law of Attraction

The Law of Attraction has gotten a lot of press in the last few years. In fact, an entire cottage industry has developed around it, with Law of Attraction coaches, seminars, books, videos, audio programs, Web sites, and other media and applications.

We've all heard the stories about people who have purported to use the Law of Attraction to do amazing things. There are reports of those who have used the Law of Attraction to make millions of dollars, to heal from incurable and fatal diseases, and to find their soul-mates.

But what is the Law of Attraction? Is it "real" law, like the Law of Gravity, or just a bunch of New Age mumbo jumbo?

And, more important, why haven't YOU been able to use the Law of Attraction to create meaningful transformations in YOUR life?

What Exactly Is the Law of Attraction?

In short, the Law of Attraction is one of the Laws of the Universe – akin to the Law of Gravity or the Law of Electromagnetism – which states that *like attracts like*.

Yes, it really is that simple: the Law of Attraction is nothing more than the Universal principle that like attracts like!

More specifically, though, when we talk about using the Law of Attraction to transform our lives – whether the problem is physical illness, emotional distress, poverty, dysfunctional relationships, or other challenges – what we really mean is that *thought energy and consciousness attracts like energy and consciousness*. In other words, what we think about and put our focus on, we tend to attract to us and create in our lives.

For example, if you are generally happy and think happy thoughts and focus on happy things, you will tend to attract happy experiences and situations in your life. On the other hand, if you are

generally unhappy and focus on sadness and despair, you will tend to attract unhappiness, sadness, and despair into your life.

The traditional application of the Law of Attraction, then, is pretty simple, and promises us the following:

If you change your thoughts and your focus, you will change your life!

According to this traditional application, making any sort of change in your life is as simple and easy as changing your thinking.

For example, if you are ill, the theory is that you simply need to shift your thoughts and your focus away from sickness and pain to health and wellness so that you will recover, no matter how serious or debilitating your condition.

Alternatively, if you are poor, the theory is that you simply need to shift your thoughts and your focus away from poverty and debt and lack to abundance and prosperity so that you will become wealthy, no matter how serious or hopeless your financial state.

Or, if you are alone and desirous of a loving companion, the theory is that you simply need to shift your thoughts and your focus away from loneliness to love and companionship so that you will quickly attract and find your most compatible soul-mate.

If you are reading this e-book, you probably are not new to the Law of Attraction. Most likely you have seen a DVD, or read a book, or visited a Web site, or been to a seminar where you were promised exactly this same thing: that if you change the focus of your thoughts, you will change your life.

However, unless you are one of the lucky chosen few who can make a few tweaks to their thinking patterns and healing instantly from a dreadful disease, or make a million dollars, or find your soul-mate, then you have probably found that changing your thinking and focus created at most small changes in your life. You probably created a vision board, and said your affirmations and mantras, and wrote out your dreams, and did all the other popular exercises that the Law of Attraction industry recommends.

But it probably didn't work! If you're not a completely healthy millionaire reading this e-book with your loving life partner while sipping a tropical drink at a vacation resort, then clearly there's more to it than what you were told.

And, after trying really hard to change your thinking and making your vision board and saying your affirmations, you probably saw a few peripheral changes in your life, but not the major shifts you were hoping for. And you probably got frustrated with it after a while, since it didn't give you the results you wanted.

I completely understand, as I went through all of this myself!

How an MIT-trained Engineer Became a Healer

In the late 1990s I went through a really horrible period in my life, where I became disabled and lived in terrible pain, doctors told me I could never recover, and I lost my job, the company I had founded that was supposed to make me rich, my life long best friend, and the woman I was in love with, all in a very short period of time. This was especially devastating because I had the world at my feet just a few years before, when I left school (I had received my Bachelor's and Master's degree in computer science from MIT and was enrolled the PhD program there) to move to California to form an Internet company and make my millions.

In response to this "dark night of the soul", one of the things I did was to get into positive thinking, working the Law of Attraction through all the traditional exercises. I made a vision board, and put power words up on my walls, and said my affirmations and mantras, and made a supreme effort to think positively and hang in there until my life changed.

But it didn't. I kept up with the positive thinking thing pretty seriously for about six months, but during that time my life just kept getting worse and worse. After a while I got so frustrated with it all that I tore down my power words and vision board and burned them, and descended into negativity, despair, and depression for the next several years. During this time I was exploring every form of conventional and alternative treatment possible to try to recover my health and get my life back, but nothing worked.

In February of 2003 I had a surgery that went terribly wrong and left me completely disabled and unable to move my right arm at all. It was like this for four months, until I found this crazy sounding technique called Theta Healing. The theory was pretty simple: that as humans our mind is divided into two portions, which we'll call the conscious mind and the subconscious mind. Theta Healing works to change subconsciously held belief systems, programs, traumas, and experiences that underlie the various problems in our lives, so that both the conscious mind and the subconscious mind are aligned and working together.

And it worked! In just one session, my frozen arm healed instantly – an honest-to-goodness miracle! I was so transformed by this experience that I gave up my career in software engineering and devoted myself to the full time study and practice of Theta Healing to unleash the power of the subconscious mind.

It took some time and some work, but by learning to harness the power of the subconscious mind, I was able to finally really learn how to use the Law of Attraction to create the life I wanted.

Chapter 2: The Power of the Subconscious Mind

The reason that traditional applications of the Law of Attraction – such as positive thinking, affirmations, mantras, vision boards, power words, etc. - are often ineffective is simple:

Most applications of the Law of Attraction don't work because they are only involving the conscious mind!

As human beings, our minds can be divided into two portions: the ***conscious mind*** and the ***subconscious mind***.

Alex Grey

The Conscious Mind

The conscious mind is the part of us that we are all intimately familiar with. It is our thoughts, the voice in our head, and how we think; it is our memories, or experiences, and what we have been taught.

Physically, the conscious mind is located in the frontal lobe of the brain. Doctors and scientists have determined conclusively that many of the so-called "higher thought functions", such as logic and reasoning, are located in the frontal lobe.

Traditional applications of the Law of Attraction involve only the conscious mind. So when you focus on positive thoughts, and say your affirmations and mantras, and do all the other Law of Attraction techniques, you are only able to access and apply the power of your conscious mind, which is only a small fraction of your total power.

The Subconscious Mind

The subconscious mind is all the rest of your mind, beyond your conscious mind. It includes your body's cellular intelligence, your genetic memories, and other influences that we may not be conscious aware of. For our purposes here, we treat the subconscious mind as all the aspects of the mind that are not the conscious mind. Others might subdivide the subconscious into the subconscious, unconscious, and super-conscious, or use other similar terms, but in this e-book we're going to lump it all into the genetic term subconscious.

The subconscious mind can be divided into four levels:

- 1) The Core Level, which includes all of your experiences and memories from your current lifetime, with the things that happened in your early childhood typically being the most powerful.
- 2) The Genetic Level, which all of your experiences and memories of our genetic ancestors, back seven generations or more.
- 3) The History Level, which is your "past life memories" of other times and places (note that you don't need to believe in past lives to use or benefit from these techniques.)
- 4) The Soul Level, which is the "big picture" for why you incarnated physically on Earth.

To learn more about the levels of the subconscious mind, please consult my book *Where Science Meets Spirit: the Formula for Miracles*, available on the Theta Healing LA Web site at <http://www.ThetaHealingLA.com>

Roughly speaking, human mind power can be broken down as follows:

- The conscious mind contains about 10-20% of your power and ability to create
- The subconscious mind contains about 80-90% of your power and ability to create

So it should be pretty easy to see why traditional applications of the Law of Attraction don't work: because they only work with a small fraction of your mind's power!

And guess what happens when 10% of your mind is trying to create one thing, and the other 90% of your mind is trying to create something else? You got it, the 90% wins every time!

It now becomes clear why a few people get amazing and sometimes nearly instant results from changing their thinking and doing the traditional Law of Attraction techniques. These lucky individuals are those who already had their subconscious mind programmed for health, or prosperity, or love, or whatever else they desired. Hence, when they shifted their conscious mind, their subconscious mind was aligned with the same goal, and they were quickly able to attract and create the experience they desired.

On the other hand, most of the rest of us aren't so lucky. For whatever reason, we carry programs and memories in our subconscious mind that conflict with the goals of our affirmations and mantras and positive thinking. Hence, no matter how much positive thinking you do, or how many affirmations you say, or how many vision boards you make, you'll just get frustrated and end up spending a lot of time, money, and energy for nothing...because 90% of your mind – the subconscious – won't allow you to have what you want!

For example, let's say that you are poor, and you would like to be rich. So you watch some DVDs and read some books and go to some seminars on the Law of Attraction. You are serious about making money, so you create your vision board, and say your affirmations, and hang your power words on your walls, and focus on positive thoughts about money and wealth. In fact, you are so dedicated and so serious about these exercises that you manage to get 100% of your conscious mind aligned with your goal of being rich.

But it doesn't work! No matter how many affirmations you say and no matter how many positive thoughts you have, you are still poor. Why? Because you're holding programming in your subconscious mind which tells you that you need to be poor, thereby counteracting and overpowering all the positive thinking and manifestation techniques you are doing with your conscious mind.

Perhaps you had a genetic ancestor who was a monk who took on a vow of poverty, and now today you are carrying the program of "I have a vow of poverty" in your subconscious mind as a genetic memory. Yet not only do you have no idea that this vow of poverty is lodged in your subconscious...because even if you knew it was there, you'd have no way to get rid of it!

And because your subconscious mind is much bigger and stronger than your conscious mind, it's going to overpower it and win every time, and you are going to stay poor forever!

That totally sucks...but fortunately, there is a solution.

The Solution: Working Directly with the Subconscious Mind

The solution is simple, in theory: we just need a way to get your subconscious mind aligned with your conscious mind so that 100% of your mind's power is focused in the same direction, creating and attracting the same thing.

Once you get both your conscious and subconscious mind aligned with the same purpose, you really can live the life of your dreams: heal physically and emotionally, attracts tons of money, and experience amazing loving relationships!

There are two parts to this solution:

- 1) We need some way to look into the subconscious mind and see what's there. To find out what is in your conscious mind is easy – I can just ask you and you can tell me. But to find out what is in your subconscious mind is not so obvious.
- 2) We need some way to change the negative programs and beliefs in the subconscious so that it will be aligned with creating the same things that the conscious mind wants (typically health, wealth, and love.)

If you are able to find tools to do both of these jobs – namely, to first find what is in your subconscious mind that is causing your problems, and to second change your subconscious to create the life you desire – then you can finally get your conscious and subconscious mind aligned to create the life you desire.

The "Secret Behind the Secret" is simple: You create with both your conscious and subconscious mind, and your mind is able to transform your life much more quickly and much more powerfully when your entire mind – conscious and subconscious alike – is aligned to achieve the same purpose.

Fortunately, the next chapter provides exactly these two tools!

Chapter 3: Muscle Testing and Theta Healing

The first tool we need is one that will let you look into your subconscious mind and see what's in there. How to do this isn't obvious, because the subconscious has typically been seen as an invisible, mysterious, off-limits part of us that is only revealed in mysterious flashes and intuitive insights in dreams and such.

Fortunately, there is an entire body of knowledge known as kinesiology which uses the technique known as *muscle testing* to ask direct questions of the subconscious mind.

Muscle Testing

The following overview of muscle testing is an excerpt from *Where Science Meets Spirit: the Formula for Miracles*:

"How does muscle testing work?

In short, when you say or think something that resonates as true with the subconscious mind, the electrical and magnetic fields around the body actually become stronger. Similarly, when you say or think something that resonates as false with the subconscious mind, the electrical and magnetic fields around the body become weaker. These electrical and magnetic fields around the body are very real, and can be measured with highly sensitive electrical equipment.

Because the strength of a muscle is influenced by the strength of the electromagnetic field which surrounds that muscle, we can measure muscle strength to determine the strength of the electromagnetic field around a person. How does this work? Anybody who has ever gone through rehabilitation after surgery or otherwise been in a physical therapist's office knows that they are full of electrical equipment. Why? Because muscles are little electro-magnetic machines. They have the property that the strength of a muscle's contraction is proportional to the strength of the electromagnetic field in which surrounds it. So, muscles actually become stronger when they are in stronger fields, and weaker when they are in weaker fields.

For example, if a man named John says "I am a man" or "My name is John", these statements resonate as true with his subconscious mind and his field. As a result, his muscles become stronger. This is a very real, very physical effect that can be measured with sensitive electrical equipment! Conversely, if John states "I am a woman" or "My name is Joan", these statements will resonate as false with his subconscious and his field. As a result, his muscles will go weak.

Because the strength of a muscle is related to the strength of the electromagnetic field in which the muscle resides, it is possible to indirectly measure the strength of a field by measuring the strength of the muscle. Specifically, if you measure the strength of a muscle when you are saying or thinking something that resonates true with the subconscious, you will actually measure that your muscles are stronger than when you are thinking or saying something that resonates false with the subconscious mind!"

Hence, by using the technique of muscle testing, we can ask direct yes and no questions of the subconscious mind, and thereby find out exactly what belief systems, traumas, and programs are held there.

Detailed coverage of various muscle testing techniques is beyond the scope of this e-book.

There is an overview of how to perform muscle testing that is available for free on the Theta Healing LA Web site, and the reader is encouraged to find a detailed treatment of four different muscle testing methods in the book *Where Science Meets Spirit: the Formula for Miracles*, and in the companion DVD video *Secrets of Muscle Testing*, both available from the Theta Healing LA web site at

<http://www.ThetaHealingLA.com>

With only this book and DVD, you will quickly be able to muscle test yourself and others using four different muscle testing techniques:

- The Arm Level Method of Muscle Testing
- The Standing Method of Muscle Testing
- The Pendulum Method of Muscle Testing
- The Finger Ring Method of Muscle Testing

Once you learn to muscle test – which for most people only takes a few minutes – you will have the power find out **exactly** what is in **your** subconscious mind!

For example, let's say that you are having trouble making a lot of money. To find the underlying belief systems in your subconscious mind that are getting in the way of your prosperity, you might muscle test the following beliefs:

- "I have to be poor to be close to God"
- "Money is the root of all evil"
- "Rich people are greedy"
- "I have a vow of poverty"
- "If I'm a rich person, people will only like me for my money"
- "I need to be poor to be a great artist"

If your muscle test result is TRUE for a belief, then it means that your subconscious mind holds that program...and you better find a way to get it out of your subconscious mind if you want to make a lot of money!

Muscle testing gives us the first tool we need to change our lives, which is a mechanism to see what is in the subconscious mind. But just knowing what it is in the subconscious mind that is blocking our health, or prosperity, or love is just half the battle; we also need a way to change these negative and limiting subconscious belief systems. Fortunately, there is another tool that does exactly this: Theta Healing!

Theta Healing

Theta Healing is an incredibly powerful technique of using a conscious theta brainwave to directly access and manipulate the subconscious mind, allowing for miraculous instant healings and amazing life transformations. It is truly the "state of the art" in working directly with consciousness; in my experience both with myself and with my clients and students, I know it works but I have seen not just one, and not just a handful, but literally **hundreds of miracles!**

Theta Healing was developed by accident in 1994 by Vianna Stibal, when she instantly healed a

life threatening cancer in her leg. After her miraculous healing, Vianna dedicated the next several years to figuring out exactly what had happened when her leg healed, and developed an easily teachable, step-by-step process to anybody can quickly learn to do. After the miraculous instant healing of my elbow in 2003, I dedicated myself to the study and practice of Theta Healing, and have been a full time practitioner and instructor for Theta Healing for the last several years.

Using the Theta Healing technique, it is possible to quickly, easily, and permanently change the subconsciously held belief systems that are blocking us from health, wealth, and loving relationships.

For example, you might muscle test yourself for the subconscious belief system "I have to be poor to be close to God" and get a TRUE answer, meaning that belief is in your subconscious mind. A Theta Healing practitioner would then access a conscious theta brain wave state to remove that program from your subconscious mind, and replace it with a better program such as "I can be rich and close to God at the same time." In an instant, it is possible to change what you are attracting with your subconscious mind, and to begin using the Law of Attraction to attract experiences of wealth rather than poverty!

If you have never been exposed to Theta Healing before, this may all sound too good to be true. But don't take my word for it – experience it for yourself! In the last several years, tens of thousands of people have experienced remarkable results from working to release blocks from their subconscious mind with Theta Healing. I personally spent seven years immersed in full time alternative therapies – everything from acupuncture to homeopathy to Reikki and Pranic healing to deep tissue massage to various cleanses, diets, and supplements, and many more too numerous to mention here – and **one hour of Theta Healing did far, far more for me than years of other treatments!**

Of course, Theta Healing is not the only way to work with the subconscious mind, but in my experience it is by far the most powerful, easiest, and quickest way to shift the subconscious mind to be in alignment with the conscious mind. And unlike other modalities, Theta Healing works extremely quickly; most people report immediate changes after their very first session.

We are so fortunate to live in a time when these life changing techniques are available to us:

- Muscle Testing, to find out what exactly is and is not in your subconscious mind
- Theta Healing, to shift the subconscious mind to be in alignment with what we consciously wish to create in our lives (typically health, wealth, and love!)

By combining traditional Law of Attraction techniques such as affirmations, positive thinking, and making vision boards with muscle testing with the state-of-the-art consciousness technology of Theta Healing, it is possible to get powerful and immediate life changes, including experiencing miraculous instant healings, incredible prosperity, and true love!

So How Do I Make this Work for Me?

Are you ready to start to finally live the life of your dreams?

Are you ready to finally experience health, wealth, and happiness?

Are you sick and tired of using Law of Attraction techniques that just aren't working for you?

If you answered "yes" to any of these questions, you're in luck, because I'm about to tell you **how you can see incredible changes in your health, wealth, and happiness - without any risk to you.**

Are you curious to learn more? Keep reading. (Of course, if your life is perfect already, stop reading this and go enjoy your perfect life!)

I'm actually a little jealous about the things in the next section, because I had to do this all the hard way. Everything below took me years and many thousands of dollars to learn and develop...bBut it is my life's purpose and mission to spread the power of Theta Healing with the world, so I've bundled all these tools together and priced them absurdly cheaply with a money-back guarantee so **you have no excuse to not start changing your life today.**
